

Запустить PowerShell от имени администратора.

Выполните команду:

Get-ExecutionPolicy

Должно вернуться: Bypass

```
PS C:\WINDOWS\system32> Get-ExecutionPolicy
Bypass
```

Если нет, то выполните

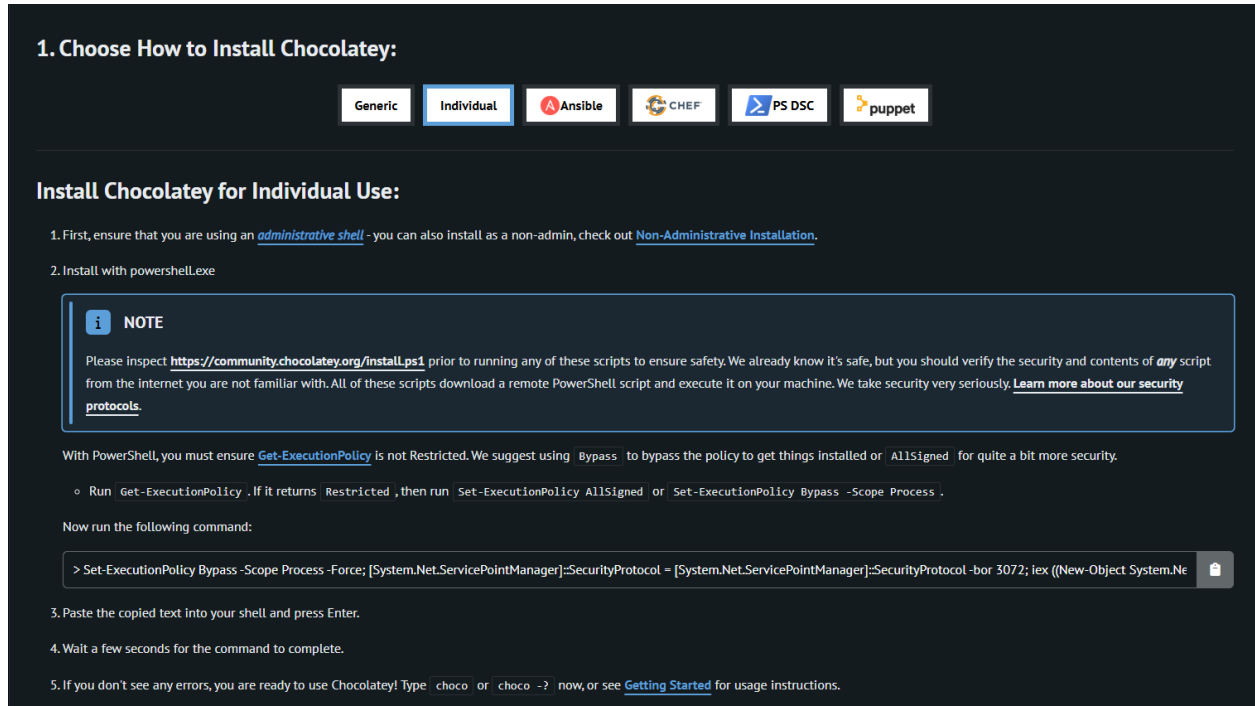

Set-ExecutionPolicy AllSigned

Или

Set-ExecutionPolicy Bypass -Scope Process

По ссылке: <https://chocolatey.org/install#individual>

Пролистайте до:

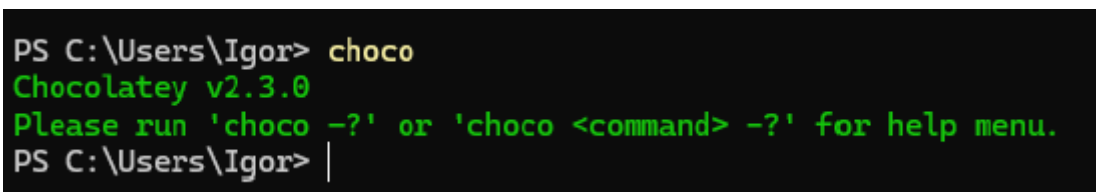

The screenshot shows the '1. Choose How to Install Chocolatey:' section of the Chocolatey website. The 'Individual' tab is selected. Below it, the 'Install Chocolatey for Individual Use:' section provides instructions. A 'NOTE' box contains a warning about script security. The instructions include running a PowerShell command to bypass execution policy. The command is: `> Set-ExecutionPolicy Bypass -Scope Process -Force; [System.Net.ServicePointManager]::SecurityProtocol = [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object System.Net.WebClient).Get('https://community.chocolatey.org/install.ps1'))`. The instructions also mention that the user is ready to use Chocolatey after this step.

Найдите команду, отмечена текстом: «*Now run the following command:*»

Вставьте в PowerShell и выполните.

Проверим, что установка была успешна — введите “choco” в терминале.

The screenshot shows a PowerShell terminal window with the following output: `PS C:\Users\Igor> choco` followed by `Chocolatey v2.3.0` and `Please run 'choco -?' or 'choco <command> -?' for help menu.` The prompt `PS C:\Users\Igor> |` is visible at the bottom.

Далее установим Redis (от имени администратора).

`choco install redis`

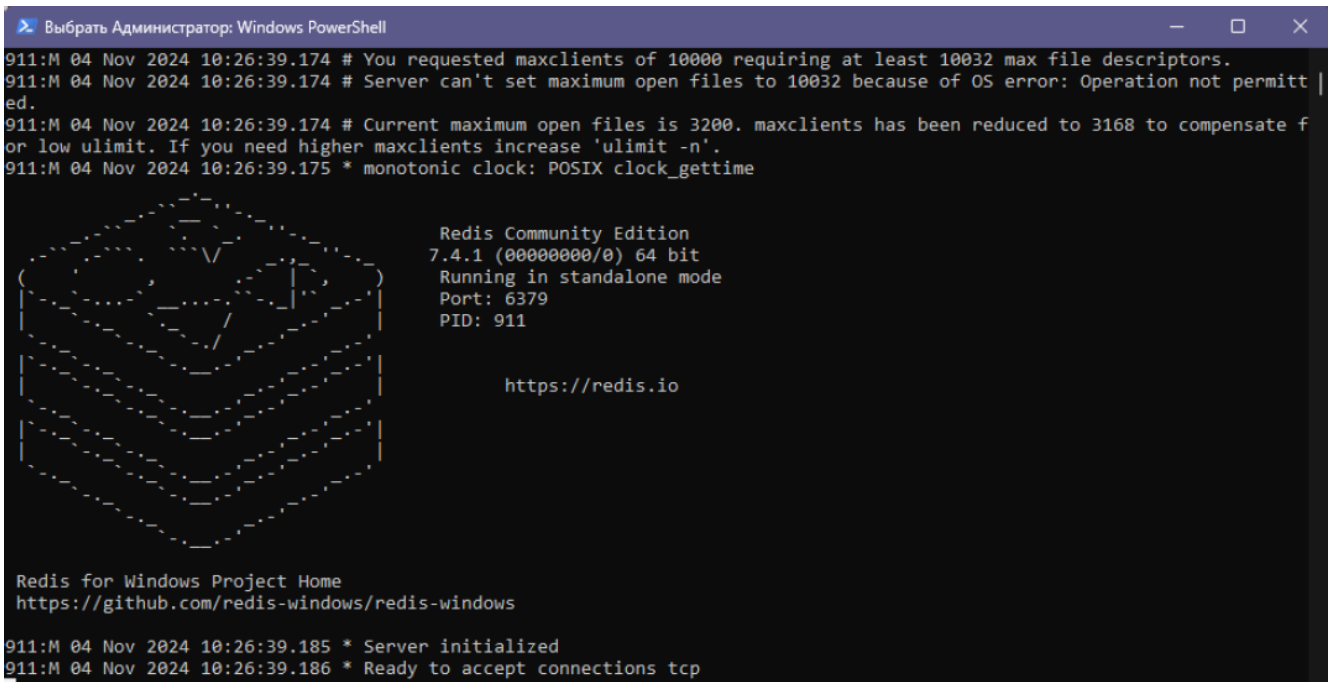

```
PS C:\WINDOWS\system32> choco install redis
Chocolatey v2.3.0
Installing the following packages:
redis
By installing, you accept licenses for the packages.
Downloading package from source 'https://community.chocolatey.org/api/v2/'

redis v7.4.1 [Approved]
redis package files install completed. Performing other installation steps.
ShimGen has successfully created a shim for redis-benchmark.exe
ShimGen has successfully created a shim for redis-check-aof.exe
ShimGen has successfully created a shim for redis-check-rdb.exe
ShimGen has successfully created a shim for redis-cli.exe
ShimGen has successfully created a shim for redis-sentinel.exe
ShimGen has successfully created a shim for redis-server.exe
The install of redis was successful.
  Deployed to 'C:\ProgramData\chocolatey\lib\redis'

Chocolatey installed 1/1 packages.
See the log for details (C:\ProgramData\chocolatey\logs\chocolatey.log).
```

Далее запустим сервер Redis в любом терминале:

`redis-server`

```
Выбрать Администратор: Windows PowerShell
911:M 04 Nov 2024 10:26:39.174 # You requested maxclients of 10000 requiring at least 10032 max file descriptors.
911:M 04 Nov 2024 10:26:39.174 # Server can't set maximum open files to 10032 because of OS error: Operation not permitted.
911:M 04 Nov 2024 10:26:39.174 # Current maximum open files is 3200. maxclients has been reduced to 3168 to compensate for low ulimit. If you need higher maxclients increase 'ulimit -n'.
911:M 04 Nov 2024 10:26:39.175 * monotonic clock: POSIX clock_gettime

Redis Community Edition
7.4.1 (00000000/0) 64 bit
Running in standalone mode
Port: 6379
PID: 911

https://redis.io

Redis for Windows Project Home
https://github.com/redis-windows/redis-windows

911:M 04 Nov 2024 10:26:39.185 * Server initialized
911:M 04 Nov 2024 10:26:39.186 * Ready to accept connections tcp
```

Видим успешно запущенный сервер Redis, можно работать.
